

Coordinated implementation of CEP

Nordic Electricity Market Forum
Oslo, 28 November 2019

Nordic CEP Task force

Main objectives

- Follow and be a Nordic interface with ENTSO-E impact analysis
- Identify the CEP topics with Nordic impact and describe them in a high level road map including timing requirements under CEP to ensure timely Nordic deliveries
- To assess the need of Nordic initiative to handle tasks with Nordic impact and propose who should be responsible for such Nordic initiative
- To follow, coordinate and if needed influence the CEP related work in relevant ENTSO-E working groups to ensure that Nordic needs are accommodated

Focus on topics that are of particular Nordic interest and that need Nordic attention!

Example: Nordic bidding zone review

- Nordic TSOs have taken part in the development of the bidding zone review
 - *The methodology is usable for Nordic conditions*
 - *Regional approach suggested but with one final all TSO report*
- Nordic TSOs have started the work but awaiting the NRA approval
- Modelling will be done by Nordic TSOs
